

**PRIVATE SPAS  
DOES NOT HEAT**

**CHECKLIST FOR TROUBLESHOOTING PROBLEMS IN**

**SAT.018.EN  
(10122015)**

|    |  |       |  |     |         |
|----|--|-------|--|-----|---------|
| 1  | Is it in standard mode?  | YES   | Go to 2  |     |         |
|    |  | NO    | Change to standard mode. OK?   | YES | End     |
| NO | Go to 2  |       |  |     |         |
| 2  | Is the setpoint temperature higher than the spa's temperature? | YES   | Go to 3  |     |         |
|    |  | NO    | Increase the setpoint temperature so that it is higher than the spa's temperature. OK? | YES | End     |
| NO | Go to 3  |       |  |     |         |
| 3  | Check the voltage in the resistor's connectors                 | 0 V   | Go to 4  |     |         |
|    |  | 230 V | Go to 5  |     |         |
| 4  | Reset the circuit board as per technical instructions. OK?     | YES   | End  |     |         |
|    |  | NO    | Change the circuit board and check whether the error persists. OK?                     | YES | Go to 5 |
| NO | End  |       |  |     |         |
| 5  | Change resistor. OK?   | YES   | End  |     |         |
|    |  | NO    | Consult  |     |         |
